

Fiber Network Coming to Sierra County —But We Need Your Help

Construction on a fiber to the premise network is set to begin in June of 2021 to bring high speed internet to rural communities in Sierra County, but we can only proceed if we obtain Right-of-Way permission from homeowners by June 1, 2021.

Please call **833-650-0480** to set up an appointment with our specialists to complete the agreement.

What Is Right-of-Way Permission?

Right-of-Way permission is an agreement granting Ethos Broadband permission to add a cable to an existing electric pole or bury a cable in the ground on your property. This will make it possible to connect your home or business to our fiber network at a later date if you choose to use our services.

PROVIDING YOUR SIGNATURE DOES...

- ✓ Help us bring a fiber network to the county.
- ✓ Grant us permission to add a cable to a pole or bury a cable in the ground on your property.
- ✓ Qualify you for free installation later if you choose to sign up for our high-speed internet when available (saving you \$500 or more!)
- ✓ Grant you access to special pricing options if you choose to sign up later (including price for life, and a service guarantee).

PROVIDING YOUR SIGNATURE DOES NOT...

- ✗ Cost you anything
- ✗ Commit you to purchase or use our services at any time
